

Dear Children, dear parents of Chinese children, ladies and gentlemen,

I am very glad to have the chance to come to the Denmark Chinese Child Adoption Centre and Enjoy Chinese Spring Festival with our Danish friends and Chinese Child adopted.

At this special time, Chinese all over the world are full of joy to farewell the Year of Tiger and greet to the rabbit. On behalf of Chinese Embassy in Denmark, I would like to express my sincere blessing to all Chinese children and deep respect to their Danish parents.

After 1990s, more than 120 thousand Chinese Children are adopted by more than 90 thousand families in 17 countries. All these families give the children loving care and deep affection. Their parents devoted a lot for the children's health growing, including time, affection, energy and vigour, all of these reveals that :

Love between human knows no boundaries, regardless of colour, beyond the blood and race.

One should devote his love first when he is available.

People's capability of love is endless, and humanity itself is a family full of love, especially facing resource shortage, environment deterioration, civilization conflict, development imbalance and other common problems.

Now, I still remember the time when all my family agreed to adopt an orphan who lost his parents in Wenchuan Earthquake. Although we did not have the chance, for there were too many people harboured the same idea, I always have a special sense of deep respect and gratitude to Danish families who adopt Chinese Children. Only the one who has a magnanimous mind, selfless, and full of true love can make the decision.

At last, I wish all Chinese children can grow happily and healthily under the care of their Danish parents full of love. Thanks again to all the Danish parents for your adoption of Chinese children, for your pure love and regardless mind of gains and losses.

Wish you healthy and all the best in the year of rabbit.
